

Why Cincinnati Bell is the #1 CONNECTION for your business

Cincinnati Bell offers best-in-class solutions for your business. Everything from the fastest Internet in town to Intelligent Wi-Fi, reliable voice solutions and more. When you work with us, you have a local partner to help your business thrive and grow.

Superior service from your hometown provider

Our state-of-the-art fiber network has greater capacity, providing a dedicated fiber line to your business, extending the fastest, most reliable Internet connection

← With Spectrum's coaxial cable, you share your capacity with multiple customers, providing a slower, less reliable service than true fiber

Our fastest upload speed is 250 Mbps; 7X faster than Spectrum's

← Spectrum's fastest upload speed is only 35 Mbps, which can be devastating to your business's productivity*

Hyper-Targeted Marketing and Data Analytics tool with Intelligent Wi-Fi

← Not Available with Spectrum service

Connect Cincinnati app: watch your business thrive with free marketing support

← Not Available with Spectrum service

Unlimited FREE Guest Wi-Fi

← Spectrum's is only free for first 30 minutes†

Your price is protected, and will not increase during the signed contract term

← Spectrum's price increases after 1 year*

Fiber is eco-friendly

← Spectrum's coaxial cables require more energy to cool, and use heavy metals in its construction

We take pride in giving back to our hometown, with over 10,000 hours of community service contributed annually

← Spectrum is Connecticut-based, and has no roots in our service area

It's no wonder we have over a 95% customer satisfaction rating!

*Contract terms and upload speeds as compared to Spectrum as of 11/2/18: business.spectrum.com/internet/high-speed-internet.html
